

CPRIT Cost Matching Endorsement

Investigator Name: _____

Department: _____

Project Title: _____

Proposal Deadline Date: _____

Texas law requires that prior to disbursement of CPRIT grant funds, the award recipient must demonstrate that it has an amount of funds equal to one-half of the CPRIT funding dedicated to the research that is the subject of the award. The demonstration of available matching funds must be made at the time the award contract is executed, and annually thereafter, not when the application is submitted. Grant applicants are advised to consult CPRIT's Administrative Rules, Chapter 703, Section 703.11, for specific requirements regarding demonstration of available funding.

To satisfy this cost matching requirement, the university is able to claim unrecovered indirect costs (i.e. the difference between the 5.263% of direct costs as allowed by CPRIT and UTHSCSA's negotiated indirect cost rate of 52.5%). Ultimately, it is expected that the PI's department will be required to provide nominal funds to bring the total cost match to one-half of the CPRIT funding. If a subaward is included on the project, the subaward institution will be expected to provide cost matching equal to one-half of the total amount of the subaward.

By signing this document, I acknowledge that I understand this requirement and plan to provide this cost match from the following project ID: _____

Additional details will be required at the time of award.

Principal Investigator

Department Chair or Institute/Center Director

Approval of Account Holder (if different from Investigator)
